

# BEACONS in a Nutshell

BEACONS is a process of short conversations that help us understand each other better and take wiser decisions about what we do and how we do things.

## Themes

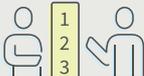

**1** Listening to each other

**2** Sharing good stories

**3** Discussing priorities

**4** Taking action

## Questions

What is it that you would like others to understand better?

What examples can we share of good education?  
(And) What might we do so that these things happened more often?

What is most useful (or most interesting) for us to discuss more?

(Based on our conversations) What can we do in our school?

(And) What messages do we most want people to hear at a national level?
